

Introduction to ASP.NET 4.0 Web Development using Visual Studio and C#

Course Length: 5 days

Price: \$2,500

Summary

This course uses Visual Studio 2010 for programmers new to Web development on the .NET platform using C# as the programming language. The focus of this class is learning the fundamentals of developing .NET Web applications. This course is a good starting point for C# programmers that are new to Web development.

Who Should Attend?

Students should be familiar with using C# as a programming language. If you are not familiar with C#, we recommend our *"Introduction to C# .NET using Visual Studio"* class as a prerequisite course.
